Objectives

After my degree I started to work on website with large traffic that helped me in many ways to grow as a skilled developer. I want to continue on that path and to work abroad to enlarge my perspectives. My goal is to become a PHP expert and to be able to manage team of developers.

Work Experience

- **May 2015 – Now: Developer - PHP**
Splio, Versailles, France
I was in charge of refactoring and optimizing the engine in charge of building statistical reports based mainly on ElasticSearch and RabbitMQ. I participated to the migration towards Symfony framework as well. I took in charge Docker's maintenance with the company's DevOPS.
- **March 2014 – May 2015: Software Developer - PHP**
Bazarchic, Paris, France
I worked for various company's division. I managed the transition from SVN to Git and support the team while they were adapting to Git. I was in charge for the rework of membership area of the website.
- **January 2013 – March 2014: Software Developer - PHP**
Rue Du Commerce, Paris, France
I worked with the payment solution SIPS from Atos. I had various missions but mainly integrating new payment solutions and optimizing the existing solutions.
- **May – November 2012 (6 months): Intern Front-End Engineer**
SAS London, London, United-Kingdom
I worked for big clients such as BP, Coca-Cola or Sainsbury, I was mainly on the front-end. With the team we deploy OOCSS in our project. At the end of my internship I was in charge of a project for Bird & Bird and managed a team of two developers.
- **February – April 2010: Intern Developer**
Atos Wordline, Seclin, France
I made a proof of concept on the early technology WebRTC and I made a jQuery plugin as well and started to work on facial recognition.
- **March – August 2010: Web Developer**
@Mi2R, Paris, France
 - Learning OOP with Zend Framework
 - Installed new server LAMP/SVN/Postfix/FTP/Bind DNS
 - Established electronic payment module

Computer Skills

- PHP, Javascript, MySQL, ElasticSearch, RabbitMQ
- Symfony, Laravel, Silex, jQuery
- GNU/Linux, Git, Apache / NGINX, Docker
- HTML, CSS/OCSS, Bootstrap

Education

- **2008-2012 : Haute Ecole d'Ingénieurs, Lille, France**
Generalist engineer formation and specialization in IT
- **2008-2006 : Haute Ecole d'Ingénieurs, Lille, France**
Class which prepares students for the Grandes Ecoles entrance exams
